

CATIO SPACES®

Designing Spaces for Safe, Healthy & Happy Cats

BIOGRAPHY

CYNTHIA CHOMOS

Founder, Catio Spaces
Speaker, Cat Lifestyle Expert

A passionate cat lover, Cynthia Chomos founded Catio Spaces to address the need for safe and visually appealing outdoor enclosures to enhance the lives of cats while also protecting birds and wildlife. After the loss of her beloved 22 year-old cat, she adopted her tabby, Serena, who is the inspiration for Catio Spaces.

Cynthia combines her expertise as a Feng Shui consultant and designer - *creating harmonious spaces for positive living* - with her catio designs to create safe and stimulating havens for felines. A general contractor and member of the Master Builders Association of Snohomish and King Counties, Cynthia works with the team of carpenters to build custom catios in the greater Seattle area. She also offers online DIY (do-it-yourself) Catio Plans for cat guardians who want to build one themselves or hire a local carpenter to build one for them. Catio Spaces donates 10% of catio plan purchases to animal welfare organizations.

Catio Spaces is a sponsor of Catio Tour Seattle, an annual event to create community awareness of the benefits of catios. Cynthia is a member of The Humane Society of the United States and National Audubon Society and is dedicated to helping protect cats, birds and wildlife.

Cynthia's speaking engagements include Seattle Pet Expo, HSUS Curious About Catios webinar, Seattle Home Show, Green Industry Expo and the International Feng Shui Conference.
