*Does your indoor cat want out?*

*Are you worried about your cat's safety outdoors?*

Cats naturally want to be outside where they can breathe fresh air and experience the stimulation of the natural world. A catio, an outdoor cat enclosure or "cat patio," is the purrfect solution to help solve the indoor/outdoor dilemma. Keep your cat safe, healthy and happy while protecting birds and wildlife.

### WHAT IS A CATIO MADE OF?

Cat enclosures are constructed using wood framing, escape-proof galvanized wire, a wire mesh or polycarbonate roof, shelves, perches and space to decorate. Wood framework can be left natural, stained or painted to complement your home. Floor options include grass, decking, pavers and more. *What else? A happy cat!*

### TYPES OF CATIOS

Catios are available in a variety of designs and sizes for a window, porch, patio, deck, garden or yard. From small and simple to large and luxurious, cats can enter a catio through a cat door in a window, wall or door to safely enjoy the outdoors all year long!
